

Poll Dorsets Lots 1-141 White Suffolks Lots 151-196

Welcome to our 20th Annual Felix Rams Lambplan Ram Sale.

All rams will be sold individually and in catalogue order. White Suffolks will be penned at the front of the shed to allow inspection to continue while the Poll Dorsets are being sold.

Animal Health / QA

MN3 and 2nd Generation Approved Vaccinated for Ovine Johnes Disease - Certificate No NS 16159

Ovine Brucellosis Accredited Free - Certificate No. CW 86/15

All lambs are vaccinated with Gudair at marking, and the rams have been given a full vaccination program with Glanvac 6 in 1, the last vaccination 4/07/17 and were drenched with Pyrimide 20/06/18

Felix Rams is a closed flock, and the sheep are declared to be footrot and lice free. Rams were treated with Extinosad 15/08/18. Sheep Health Statement on display, and available if required. LPA NVDs will be provided with all rams.

Across Flock Lambplan averages for the 2017 drop (all asbvs and indexes Lambplan run 01/08/18)

Sheep Genetics Lambplan Terms

BWT “birthweight” – lower birthweight values will producer lighter birthweight lambs

PWT “postweaning weight” - a higher pwt value ram will produce faster growing progeny

PFAT “postweaning fat” – the more negative the value for pfat, the leaner the progeny will be

PEMD “postweaning eye muscle depth” – rams with positive values for pemd will have more muscle especially in the high value loin area and hind quarter, and better overall carcass shape.

PWEC “postweaning worm egg count” – a lower (more negative) value for pwec indicates the progeny will have lower worm egg counts and be more resistant to developing a worm burden

Acc percentage accuracy of the ASBV or index

s/t whether the animal was born single, twin or triplet

DOB date of birth

Indexes are designed to help meet different breeding objectives and programs. They are simply a guide to assist in selection, however when doing so producers should first consider their own breeding objective. This will involve considering your current ewe base, the environment they are run in and the target market for their progeny. Rodney is happy to discuss this at any time.

Trade \$ Index optimizes fat at 0, no emphasis on birthweight

Export \$ Index optimizes fat at -1.5, no emphasis on birthweight

Carcass Plus (C+) growth and muscle with minimal emphasis on fat

Lamb2020 minimal emphasis on fat, but includes birthweight and worm egg count. The best index to use with a bwt and pfat range to suit your production system for 22-26 kg lambs

LEQ a new index incorporating lean meat yield and eating quality, no emphasis on birthweight

At Felix Rams all the important data for these rams is collected before they are 7 months of age – reflecting what you aim to do in your prime lamb enterprise. They are run commercially in large management groups on pasture, so their performance is what you will see in your paddocks. What you see is what you get. We breed rams to produce outstanding prime lambs efficiently.

Our commitment to accurate data collection and effective management groups and their use in estimating the breeding value of rams is second to none.

Please join us for a cuppa from 10.30am, BBQ before the sale, and some refreshments at the conclusion.

Rodney, Liz, Isaac and Val Watt
