

**22nd Annual On Property Lambplan Ram Sale
"Springvale" 349 Adams Lane Greenethorpe 2809**

Tuesday 1st September 2020
Sale starts 1 pm Sharp

Poll Dorsets Lots 1-143 White Suffolks Lots 144-198

Welcome to our 22nd Annual Felix Rams Lambplan Ram Sale.

All rams will be sold individually and in catalogue order. White Suffolks will be penned at the front of the shed to allow inspection to continue while the Poll Dorsets are being sold.

COVID-safe measures will be in place. To reduce the COVID risk we would ask that no more than 2 people per business attend. Please do not attend if you have travelled to a hot spot in the last 2 weeks, have been in contact with some suspected of having coronavirus, or have any symptoms of the virus. If this makes you unable to attend, please contact Rodney (or the agents) for alternative arrangements

Animal Health / QA

MN3 and 2nd Generation Approved Vaccinated for Ovine Johnes Disease - Certificate No NS 18162

Ovine Brucellosis Accredited Free - Certificate No. CW 86/15

All lambs are vaccinated with Gudair at marking, Eryvac x 2, and the rams have been given a full vaccination program with Glanvac 6 in 1, the last vaccination 18/05/20 and were drenched with Pyrimide 6/07/20

Felix Rams is a closed flock, and the sheep are declared to be footrot and lice free. A Sheep Health Statement will be displayed, and available if required. LPA NVDs will be provided with all rams.

Lambplan averages for the 2019 drop (all asbvs and indexes Lambplan run 01/08/20)

BWT "birthweight" – lower birthweight values will produce lighter birthweight lambs

PWT "postweaning weight" - a higher pwt value ram will produce faster growing progeny

PFAT "postweaning fat" – the more negative the value for pfat, the leaner the progeny will be

PEMD "postweaning eye muscle depth" – rams with positive values for pemd will have more muscle especially in the high value loin area and hind quarter, and better overall carcass shape.

PWEC "postweaning worm egg count" – a lower (more negative) value for pwec indicates the progeny will have lower worm egg counts and be more resistant to developing a worm burden

Acc percentage accuracy of the ASBV or index

s/t whether the animal was born single, twin or triplet

DOB date of birth

Indexes are designed to help meet different breeding objectives and programs. They are simply a guide to assist in selection, however when doing so producers must consider their own breeding objective. This will involve considering your current ewe base, the environment they are run in and the target market for their progeny. Rodney is happy to discuss this at any time.

Trade \$ Index optimizes fat at 0, no emphasis on birthweight

Export \$ Index optimizes fat at -1.5, no emphasis on birthweight

Terminal Carcass Production (TCP) aims to improve growth and muscle and maintain eating quality. TCP does not include birthweight, and has emphasis on negative fat

Lamb Eating Quality (LEQ) improve growth muscle worm egg count, eating quality and yield. Does not include birthweight or fat.

At Felix Rams all the important data for these rams is collected before they are 7 months of age – reflecting what you aim to do in your prime lamb enterprise. They are run commercially in large management groups mainly on dryland lucerne based pasture, so their performance is what you will see in your paddocks. What you see is what you get. Our aim is to breed sound rams to efficiently produce outstanding prime lambs.

Our commitment to accurate data collection and effective management groups and their use in estimating the breeding value of rams is second to none.

Rodney, Liz, Isaac and Val Watt

NB Ram breeders. The minimum price for a ram to be individually registered as a stud ram will be \$3000.

Not all rams are available for individual registration.
